

## **Personal Aquatic Device Policy effective January 1, 2015**

The following policy is in effect for all ALRPOA Members, and provides guidelines for personal aquatic devices.

For the purpose of this policy a Personal Aquatic device is defined as a Hot Tub or Swimming Pool. A Hot Tub is further defined as a device with less than 700 gallon water capacity. A Swimming Pool is further defined as a device with greater than 700 gallon capacity.

ALRWATCO supply's potable water for personal use and approves said water for Hot Tub use as long as it is below the 700 gallon limit. Should a Member require water to supply a device, with a volume greater than 700 gallons, such as a swimming pool the BOD requires that said device be supplied with water that is hauled under the direction of the Member.

Violation of this policy will be subject to the highest existing water rate, for the entire water bill.
